

STIKCAM[®]

Camera on a Stick

'seeing is believing'

Stikcam[™], is the simple way to achieve extreme close ups, fast flowing pans and other exciting options with the minimum of set-up and technical intervention. Stikcam is easily set up and operated by a single person. It's robust jib arm provides crane shots in confined and extreme places, unreachable with conventional systems. In fact Stikcam is as versatile as your imagination. It can get you to the front of the scrum for a grabbed interview, on stage at a rock concert, without you ever coming between the audience and the talent. There is no attachment to the body allowing greater freedom of movement and increased safety in extreme conditions, although it may be mounted on a harness or tripod. The use of ultra light materials and simple design ensures low maintenance with little user adjustment.

FEATURES

- Mechanical Pan and Tilt Head
- Hard Anodised
- Titanium Camera Protection
- Fully waterproof
- Rust Proof
- Extremely light weight
- Changeable pivot point
- Extremely Rugged
- Multiple Camera Mounts
- Gimble Tripod mounts
- Body Harness

BENEFITS

- Can be located in discreet locations
- Left-hand and right-hand operation
- Rig time less than 1 minute
- Single man use
- Improves safety in Hazardous environments.
- Easy operation
-

Stikcam[®] is a low-cost, highly versatile miniature jib arm. Extreme shots, setup, reliability
